PLC-2760LC-RMJ1

2-Needle, Semi-Dry, Post-Bed, Unison-Feed,
Lockstitch Machine with Vertical-Axis 2.0 Fold
Capacity Hook, Decorative Stitch with Rotating
Needle-Bar

JUKI ECO PRODUCTS

The PLC-2760 Series is eco-friendly product which complies with JUKI ECO PRODUCTS standards for protecting the environment.

● The sewing machine complies with the "Juki Group Green Procurement Guidelines" on the use of hazardous substances, which is stricter than other restrictions, such as those of the RoHS Directive.

For details of JUKI ECO PRODUCTS, refer to: <https://www.juki.co.jp/en/company/eco>

*The RoHS Directive is an EU Directive limiting the use of 6 hazardous substances (lead, hexavalent chromium, mercury, cadmium, PBB and PBDE) in electrical and electronic equipment.
*The Juki Green Procurement Guideline is the voluntarily established criteria to eliminate not only the aforementioned six substances, but also other ones which also adversely affect the environment.

Registered Organization: JUKI CORPORATION Head Office
The Scope of the Registration: The activities of research, development, design, sales, distribution, and maintenance services of industrial sewing machines, household sewing machines and industrial robots, etc., including sales and maintenance services of data entry systems.

MARCH 2024, Printed in Japan(TN)

PLC-2760LC-RMJ1

The robust PLC-2760LC is equipped with a needle-bar rotating system with a user-friendly interface allows the creation of decorative stitches with thick threads.

Preloaded & Custom Patterns

Elevate your production with the pre-loaded and custom patterns offered on the PLC-2760LC series. Featuring an array of meticulously curated pre-programmed patterns, the PLC-2760LC series offers unparalleled design versatility. What sets this machine apart is its innovative 1-needle and 2-needle setup, empowering you to effortlessly create bespoke patterns, tailored to your exact specifications.

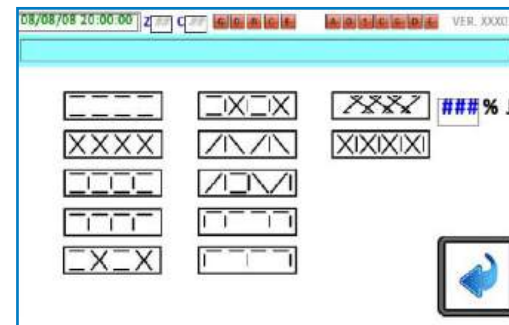

FEATURES

Electronically Controlled Adjustments

A dedicated control box allows for logical interface for the operator to select the applicable pattern.

The easy to navigate software makes selecting and changing stitching patterns simple for the operator.

Vertical-Axis Double-Capacity Hook is Adopted

Utilizes a design which allows adjustment (screw) for the needle guard opening volume. As adjustment for the needle guard is simple, sections of the needle guard are hardened to prevent wearing of the blade point on the hook and skipped stitches.

Digitally Control Stitch Length

The sewing machine is able to control the stitch length digitally.

"One-Touch" Bobbin Winding Device

Bobbin winding system eliminates the requirement to manually wind the bobbin during the beginning of operation. Users can simply set the bobbin to enable auto winding.

Superior Basic Performance that Produces High Responsiveness to Materials

Longer Distance from Machine Arm to Needle Working Area

Superior workability for larger sewing operation and extra heavy material.

Synchronizer Installed

The synchronizer enables you to halt the needle at different pre-set positions, making it perfect for tasks like corner stitching or any process that necessitates precise up or down needle placement.

Walking Foot Alternating Vertical Movement Mechanism that Prevents Irregular Stitches

The sewing machine incorporates a mechanism which maintains a steady balance of alternating vertical movement of the walking foot and presser foot even when the material is changed. Maximum alternating height is featured with 9mm, thereby allowing smooth passage when overcoming the step.

OPTIONAL GAUGES

2-Needle

Part	Throat Plate	Feed Dog	Needle Clamp	Presser Foot	Walking Foot	Side Cover (Asm.)
