

NA-35DUT-1

Direct-Drive, Post-Bed, Top and Bottom Wheel-Feed and Needle-Feed Lockstitch Machine with Automatic Thread Trimmer, with Digital Stitch Length Control.

Digital Stitch Length Control

Equipped with digital stitch length control function as standard.

Stitch length can be programmed easily by control panel without having to grab a mechanical knobs etc.

Direct-drive motor is installed

The direct-drive motor system has been adopted.

As a result, the sewing machine starts up swiftly and promises increased stop accuracy, thereby demonstrating improved responsiveness.

Increased productivity by improved operability

With a hand switch as standard equipment, operators can quickly switch between frequently used functions in sewing work, improving productivity.

NA-35 series is best-suited for sewing of shoes (sports shoes, leather shoes, casual shoes, etc).

Features

LED Light

Standard equipped with LED light to illuminate the hand of the needle. The work efficiency of the operator is improved.

Feeding mechanism

It equips with powerful roller feed and needle feed mechanism to ensure precise and accurate feeding, leading top-quality seam appearance.

Head integrated electrical box

With the electrical box integrated with the head, various settings can be made on the panel. The panel uses an easy-to-understand pictogram, making it easy to use even for beginners.

Mechanism of Automatic thread trimmer

The Automatic thread trimmer achieves consistent thread trimmer regardless of thickness of the thread, i.e., from thin to thick thread. The automatic thread trimmer improves workability and increases productivity. When compared with the sewing machine without a thread trimmer, NA-35 Series substantially decreases the consumption of thread.
