

JIN

NA-35UT Series

Direct-drive, 1-needle/2-needle, Roller presser post bed, Lockstith Machine with Automatic Thread Trimmer.

Presser-up / Thread trimming function

Equipped with automatic presser-up / automatic thread trimming function as standard equipment. It reduces operator work and provides stable sewing quality.

Direct-drive motor is installed

The direct-drive motor system has been adopted. As a result, the sewing machine starts up swiftly and promises increased stop accuracy, thereby demonstrating improved responsiveness.

Increased productivity by improved operability

With a hand switch as standard equipment, operators can quickly switch between frequently used functions in sewing work, improving productivity.

NA-35 series is best-suited for sewing of shoes (sports shoes, leather shoes, casual shoes, etc).

Features

LED Light

Standard equipped with LED light to illuminate the hand of the needle. The work efficiency of the operator is improved.

Feeding mechanism

This sewing machine uses a powerful roller feed mechanism to ensure reliable fabric feed even for thick fabrics such as shoe sewing.

Head integrated electrical box

With the electrical box integrated with the head, various settings can be made on the panel. The panel uses an easy-to-understand pictogram, making it easy to use even for beginners.

Mechanism of Automatic thread trimmer

The Automatic thread trimmer achieves consistent thread trimmer regardless of thickness of the thread, i.e., from thin to thick thread. The automatic thread trimmer improves workability and increases productivity. When compared with the sewing machine without a thread trimmer, NA-35 Series substantially decreases the consumption of thread.
